Project Group: Machine Learning for Predictive Maintenance

Minutes for February 03, 2021. 09:00 - 11:22

Present: Tanja Tornede *(Supervisor)*, Anurose Prakash, Christopher Zinda, Gourav Prakash, Paul Fährmann, Saghar Heidari, Sanjay Gupta, Selami Hoxha, Vinay Kaundinya

Minutes-taker: Christopher Zinda

Topics Discussed:

Each team member presented their work for week 5

Details —

1. Each member presented their work.

General notes for document review

Details —

1. Use "ht" in square brackets for figures and tables

2. Check correct word spelling: time series, dataset, multivariate

3. Always use "\ref{}" for section/image/table references

4. Use "\mathbb{R}" for real value space. Add "_{\geq 0}" if you want to restrict it.

5. Use "\textwidth" for image width (with optional factor e.g. "0.8\textwidth")

6. Do not use height for images at the same time

7. Use "Figure \ref{}", "Table \ref{}" and "Equation \ref{}"

8. Every figure should be mentioned and explained in the text (but not in brackets)

9. Don't have "paper squares" in background of figures

10. Mention that images are taken from paper and not just add reference

11. Use bold table headings and add all table lines

12. Check for overflow warnings due to math notations

13. Embed references in the text and not just add them at the end of the paragraph (very important!)

14. Look for LaTeX warnings and errors in your chapter

Tasks for the next two weeks

Details —

1. Everyone has to implement the review until next week

2. Then contact review partner (see Tanjas notes) to let them review the added content

3. Vinay will write Abstract section

4. Sanjay fixes Title, Author and Date

Next Meeting:

1. Date and time: February 18, 2021 at 09:00 - 11:00

2. Person responsible for minutes: Gourav Prakash
